Work Experience

ITC Infotech — Software Developer

Aug 2019 – Apr 2020

Karnataka | India

- Developed a dynamic website utilizing Angular, Express, MongoDB, Node js, Bootstrap, HTML/CSS, and REST API to facilitate online food sales
 - Mitigated and reduced security risks by Implementing robust user registration and login verification functionality to ensure secure access and protect user information.
 - Optimized website performance by implementing pagination for efficient data retrieval and smooth user experience.
 - Implemented CRUD (Create, Read, Update, Delete) operations, enabling efficient management of food items, orders, and user profiles.
 - Collaborated with cross-functional teams of developers and designers to seamlessly integrate UI features and ensure timely project delivery.
- Evangelized cross-platform mobile application of Android & iOS using Xamarin technology, enhanced optimization, performance for extraction for better output of multiple applications.
 - Delivered strategic projects of agricultural land mapping using C#, XML, SQL and LINQ. Created application with Google map API to improve operational efficiency of land mapping & operations.
 - Farmer can plot his land by walking around the field with his app started. Locations of the field will be collected using Google map API and land mapping and calculations of the field are done automatically by the application
- Developed an individual project to manage clients data and income details.
 - Added features like client balance update, user registration and login authentication ([Github](#))
- Created a task manager application to manage tasks based on priority.
 - CRED operations and login verification with JWT token is implemented using Node.js and JavaScript ([Github](#))

Certifications & Projects

Angular Front to Back: [Udemy Certificate](#)

- Mastered Angular 5+ to build impressive single-page applications, leverage advanced concepts, implement secure authentication, and seamlessly integrate Bootstrap 4

Github Repositories: [Portfolio](#)

- These are my innovative projects and contributions on GitHub, demonstrating expertise in C#, MEAN Stack, JavaScript, SQL and MongoDB databases projects

Education

Conestoga College

Aug 2022

Web Design & Development

Concentration 1: Full stack development **Concentration 2:** Software development

Skills & Interests

Technical Knowledge: MS Visual Studio for coding and debugging, Object Oriented Programming, SQL, C#, .Net Framework, LINQ, HTML 5, Angular, React JS, Typescript, jQuery, JavaScript, Bootstrap, Web API, REST, JSON

Soft Skills: Complex problem-solving skills, ability to write clean, concise, maintainable code, excellent verbal and written skills, self-starter and able to work in a fast-paced complex environment
